PROJECT

SmartFlow – Intelligent Service Request & Technician Matching Platform

Tech Stack: Java 17, Spring Boot, MySQL, HTML, CSS

- Developed a full-stack service request platform connecting customers with technicians based on skills, availability, location, rating, and workload.
- Built REST APIs using Spring Boot for customer, technician, and service request workflows.
- Implemented a first-technician-wins assignment mechanism to ensure only one technician can accept a service request.
- Implemented the complete request lifecycle: OPEN → ASSIGNED → IN_PROGRESS → RESOLVED → CLOSED.
- Developed technician management, location-based matching, customer reviews, and rating functionality.
